
Enhanced Cleaning Procedures – Covid-19

Eligo is associated with the highest standards of cars and during this time of Covid-19, clean vehicles is especially important to us, and even more crucial.

That's why we have modified the cleaning procedures performed by Owner between every Trip based on recommendations from various health authorities.

On top of vacuuming and general wipe-down cleaning, we are requiring Owners to sanitize with disinfectant key areas between every Trip, using an approved sanitizing solution based on this Government Information: <https://www.canada.ca/en/health-canada/services/drugs-health-products/disinfectants/covid-19.html>

These areas include:

- Key and key fob
- Centre console
- Cupholders and compartments
- Seat surfaces and inside pockets
- Areas between seat/console
- Dashboard and all Driver Controls
- Mirrors
- Instrument panels
- Steering wheel and column
- Accessory panel
- Door interiors and cubbies
- Door handles (both interior and exterior)
- And ANY other high-touch areas
